

Certificate III in Information Technology (Network Administration)

National ID: ICT30120 | State ID:AC11

Ready to start your career in the fast growing ICT industry?

This course provides you with the skills and knowledge to support information technology activities in the workplace **across a range of ICT areas** including technical support and network administration.

You will learn how to **configure, secure and test system software** for a small home office network or small to medium business network.

Gain these skills

- Learn Networking Technologies that will support you in your learning of Cisco, Microsoft & RedHat products at Certificate IV level
- Disassemble and reassemble desktop PCs from their components and learn basic hardware maintenance.
- Advanced settings and features of the client side Windows Operating Systems using Virtual Machines.
- Programming Python gives you a head start in network scripting.
- Create professional workplace documents using Microsoft Office 2016; Word (word processor), Excel (spreadsheet) and Access (database)

Your qualification prepares you for roles such as:

Network Administrator

Further Study Option(s)

Certificate IV in Information Technology [Networking]

Diploma of Information Technology [Advanced Programming]
