

Certificate III in Sterilisation Services

National ID: HLT37015 | State ID:AWK3

An essential support service for the health industry

Did you know that over one quarter of all people admitted to hospital have an operation? Many more have treatments that require sterile equipment to be used. You could assist in **ensuring that patients are protected from infection** during their care.

Being able to **work with others** and carry out your **work safely** is an important part of sterilisation work and is covered in this course.

On completion of your course you will be able to work in a private or public hospital, a clinic or an operating theatre sterile supply department.

Gain these skills

- Infection control and prevention
- Clean, inspect, package, sterilise and distribute instruments and equipment for surgical and clinical procedures
- Knowledge of how the body works
- Medical terminology

Your qualification prepares you for roles such as:

Sterilisation Technician

Other job titles may include:

- Instrument Technician
- Sterilisation Assistant

Further Study Option(s)

Certificate IV in Sterilisation Services
