

Diploma of Horticulture

National ID: AHC50416 | State ID: BDD0

Take your horticulture career to new heights

This course will develop the skills you need

to **design, plan, implement, manage** and **evaluate** horticultural operations and processes to effectively manage and maintain public and private **parks, reserves, gardens, natural bushland** and **community recreation areas**. This will include developing your skills in how to establish and manage a horticultural business or project, which includes preparing estimates, quotes and tenders; selecting plants and landscape solutions; managing plant health programs; developing production plans; and managing staff and services.

Gain these skills

- Plant nutrition and health
- Propagation and recognition of plants
- Landscape design, products and services
- Business management and administration

Your qualification prepares you for roles such as:

Team Leader | Horticultural Manager | Horticultural Consultant | Nursery Manager | Garden Centre Operator | Parks and Gardens Manager | Irrigation Master Technician

Other job titles may include:

- Horticultural Team Leader | Horticultural Manager | Horticultural Consultant
- Nursery Manager
- Garden Centre Operator
- Parks and Gardens Manager
- Irrigation Master Technician
