

Certificate II in Electronics

National ID: UEE21920 | State ID:BFN1

Are you looking for an electronics career?

In this course you will develop the ability to select, assemble, set up and maintain electronic devices, for a variety of uses, following prescribed routines. You will also have the opportunity to fault-find, and repair equipment.

Gain these skills:

- assemble and replace **electronic components**
- troubleshoot **DC circuits**
- use **test equipment**
- utilise workplace health and safety and sustainability practices

This qualification will prepare you for higher level studies, which are strongly recommended to enhance your employability skills.

Your qualification prepares you for roles such as:

Electronic Draftsperson, Electronic Technician, Electrical Or Telecommunications Trades Assistant

Further Study Option(s)

Certificate II in Data and Voice Communications

Certificate III in Electronics and Communications

Certificate IV in Electronics and Communications

Diploma of Electronics and Communications Engineering
