Certificate II in Computer Assembly and Repair

National ID: UEE20520 | State ID:BFP7

When you complete the Certificate II in Computer Assembly and Repair you will develop the ability to select components and assemble computers to customer specifications. You will also learn how to carry out routine hardware repairs (generally by replacement) of known faulty components.

Gain these skills:

- **Repair**, maintain, **assemble** and upgrade a **personal computer**
- Replace components and **circuit boards**
- Use test equipment
- Learn **computer operating systems**
- **Low voltage circuit analysis**
- Workshop environments methods
- Utilise workplace health and safety and sustainability practices

Higher level studies are strongly recommended to enhance your employability skills.

Your qualification prepares you for roles such as:

Electronics Trades Worker, Computer Assembler, Computer Servicer, ICT Support Technician, and Hardware Technician.
