

# Certificate II in Conservation and Ecosystem Management

National ID: AHC21020 | State ID:BGH1

## Get started on your career in conservation and ecosystem management

This qualification will provide you with the **practical skills and knowledge** to assist with a range of tasks to maintain and **restore natural** and **cultural places** and **farmland**.

You will also be able to choose from a range of subjects that include working with plants and animals, construction and maintenance, using machinery and equipment, and managing resources. You will be able to focus your studies in different areas which include conservation earthworks, Indigenous land management, lands, parks and wildlife, natural area restoration and management, weed management and vertebrate pest management.

Gain these skills:

- operating machinery
- recognising flora and fauna
- planting shrubs and trees
- organising propagation
- restoring and maintaining wildlife habitat refuges
- treating weeds
- safely handling chemicals
- implementing workplace safety and health measures

## Your qualification prepares you for roles such as:

Conservation Earthworks Trainee, Pest Management Assistant (Feral Animals), Landcare Assistant and Indigenous Land Management Assistant

Further Study Option(s)
