

Certificate III in Engineering - Technical

National ID: MEM30522 | State ID: BIV7

Pursue your career in a wide range of engineering fields

This course will provide you with the practical skills and knowledge, including workshop and measurement skills, to allow you to **produce drawings for manufacture**.

Learn how to **use and operate computer-aided design (CAD)** to create drawings. In addition you will work in teams to produce projects.

On successful completion of this course you may be able to work in a number of different engineering related industries including mining and mineral processing, manufacturing, oil and gas and automotive.

Gain these skills

- Workshop Basics including Hand Skill and Measurement
- Drafting Skills with link to workshop
- Problem solving and project work

Your qualification prepares you for roles such as:

CAD Designer | Drafter | Technician | Engineering Draftperson

Further Study Option(s)

Diploma of Engineering - Technical (Drafting)
