

Certificate II in Horticulture

National ID: AHC20422 | State ID:BJB5

Plant the seeds for a career working outdoors.

If you enjoy working in nature, cultivating gardens and love seeing your hard work flourish, this course is for you. In this entry-level qualification, you'll gain the practical skills and knowledge to work effectively in the horticultural industry. Horticulturists most commonly work in a gardening, nursery and landscaping setting.

Some things you'll learn:

- How to recognise plants
- Landscaping, pruning and planting plants
- How to treat weeds and pests
- How to operate basic machinery and equipment
- How to assist with soil or growing media sampling and testing

Your qualification prepares you for roles such as:

- Beekeeper
- Floriculture Tradesperson
- Horticulturalist
- Landscape Gardener
- Greenkeeper
- Nursery worker
